Summary

Senior software engineer with strong and wide-ranging technical competencies, able to work with a minimum of supervision, quickly and to a high standard. I have 10 years of commercial work experience across several different industries including financial services, insurance and health.

Skills

- *Expert:*   Typescript, ES6, React, React Native, HTML5, CSS3, SASS, Node, NPM, Yarn, Jest, Webpack
- *Proficient:*   AWS DynamoDB, Serverless, GraphQL, Gitlab CI, GitHub Actions, Docker, Kubernetes, SQL

Work Experience

Software Consultant   **UBS (contract)** – London   Sep 22 – Present

- Dashboard implementation project, split Developer/Dev Ops role where I help build the application in React/TypeScript and the CI/CD pipeline to deploy the app using Gitlab CI, Docker and Kubernetes

Senior Software Engineer   **RUNNA** – London   Feb 22 – Aug 22

- Working as part of a small development team at a startup building out a mobile app for personalised run coaching. App built with Typescript, React Native, Apollo GraphQL, DynamoDB, Lambda and Serverless.

Senior Software Engineer   **Nationwide Building Society** – London   Aug 19 – Feb 22

- Helped build a new business savings mobile app in React Native powered by cloud native technologies. As the senior engineer on my feature team I led development on key payments and accounting service features.

Front End Developer   **WebMD** – London   Jun 17 – Aug 19

- Working as part of a large development team alongside designers, writers, editors to develop websites and apps for medical professionals.

Front End Developer   **AIMIA (contract)** – Sydney   Apr – Dec 16

- I was the principal Front End developer in an agile environment alongside a .NET team to develop a fully compliant WCAG website for a leading Australian bank.

UI Developer   **IAG** – Sydney   Jul 14 – Apr 16

- Developing front end applications in an Agile environment working across multiple projects and teams.

Front End Developer   **Oakton (contract)** – Sydney   2014

- Short term contract tasked with improving an existing websites user experience as well as general bug and style fixing. Technologies primarily used during this role were HTML5 and JavaScript.

Front End Developer   **Rice Warner (contract)** – Sydney   2014

- JavaScript developer role working on a bespoke, cloud-based and responsive financial planning application developed for a major Australian bank.

Front End Developer   **True Alliance (contract)** – Sydney   2014

- Working as a contracted front-end developer on two main projects for multiple globally recognised fashion brands.

Web Developer   **Rail Europe** – London   Jul 12 – Jan 14

- Principle web developer within the eCommerce team. Also was a key member in rebranding from 'Rail Europe' to 'Voyages-sncf' including migration of content management systems.

Personal Projects

- *2023* – **Claremont Gorillas** – I'm currently building a React Native app for my football team, this allows the players to check fixtures, see player/team stats, notify of their availability for upcoming games and more.

- *2021* – **Wembeerly** – Prior to the Euro 2020 football championship I and 3 other friends brewed and launched our own beer with proceeds going to charity (Grassroots for Good). I built the website and payments system from scratch using React and Stripe as our payment processor.

- *2019* – **EMBA** – I built a brochure website for a friend who launched their own alcoholic drink called EMBA, this was built using React (GatsbyJS) and Node.

Education

BSc Hons Multimedia Computing   De Montfort University, 2008 – 2011
